

Ashna Patel

PhD Candidate, Faculty of Architecture, CEPT University

Program Lead - CEPT Conservation Site Schools, Center for Heritage Conservation, CRDF

Research Area Keywords:
architecture, urban regeneration,
heritage tourism, stakeholder
dynamics, spatial agency

Ashna is an architect with an MA in International Architectural Regeneration and Development from Oxford Brookes University, UK. Her PhD study examines the role of tourism in regenerating historic urban cores, focusing on the old city of Udaipur, Rajasthan. Her role at CHC-CRDF has involved the development and management of collaborative conservation initiatives, which include facilitating research and pedagogic activities, curating public events, engaging local stakeholders, and overseeing on-site conservation work. Her teaching experience includes studios on Architectural Conservation and Urban Regeneration in the Master's in Conservation and Regeneration program at Faculty of Architecture, CEPT University, and undergraduate studios and theory-based courses at School of Environmental Design and Architecture (SEDA), Navrachana University and the Department of Architecture, MS University in Vadodara. She is also a co-founder at Fifth Column, an architectural practice focused on contextually-driven design.
